

Simple-to-follow procedure for trained professionals

CLINITEST® Rapid COVID-19 Antigen Test

siemens-healthineers.com

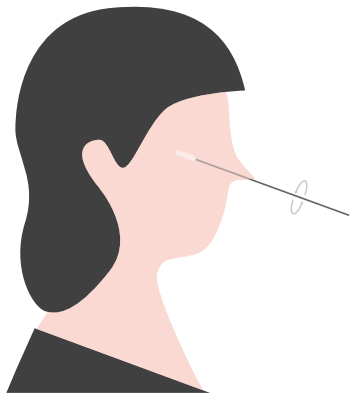

Do not use test kit after the expiration date.

Used materials should be discarded as biohazardous waste in accordance with local regulations.

Bring specimen and test components to room temperature if needed (15–30°C) and use the appropriate personal protective equipment.

1

Carefully insert the nasopharyngeal swab into patient's nostril, gently rotate the swab several times over the surface of the posterior nasopharynx, and gently remove.

2

Add 10 drops (~300 µL) of the sample extraction buffer into the extraction tube, keeping the tube upright using the stand provided.

3

Roll the swab 6+ times inside tube, squeeze against bottom and sides of tube, let stand for 1 minute, and squeeze several more times.

4

Safely remove and discard the swab, and insert dropper tip into the tube containing the specimen.

5

Lay cassette flat, label, and add four drops (~100 µL) of the test sample into the sample well. Results will be ready in 15 minutes.
